

McAvey's Helpful Hints for a Smooth Move

1. Before you start packing, it is a good idea to go through all of your goods, and give away or throw away what you don't need.

2. Packing:

- Make sure you have plenty of supplies; cartons, paper, tape, etc.
- Cartons should be packed tight, so there is no inside movement.
- All cartons should be taped closed on the top and bottom.
- No plastic bags.
- Pack dishes on edge, NOT FLAT. Glasses open end face down.
- Label each carton for the room it is to go into in your new home.
- Long distance and storage customers should put their names on the side of all cartons.
- All items must be properly packed by McAvey Movers or you the customer before loading. Any items not packed cannot be transported.

3. Refrigerators and freezers MUST BE EMPTY when moving.

4. Flammable, combustible and caustic items cannot be transported by your mover. IE: paints, oils, fire extinguishers, aerosol cans, propane tanks, bleach, etc.

5. If you move locally, you may want to take table lamps, small glass tops, wall hangings, stereos and electronics in your car, otherwise they must be packed in a carton.

6. As the movers empty each room, check to see that all rooms are completely vacant. It is your responsibility to make sure the house is empty before the movers leave.

7. It is a good idea to have a floor plan ready for your new home, so uploading will be more efficient.

8. During the winter months customers are responsible for removing snow and ice from their driveways, walkways, steps, etc. (clean path to front entrance).

9. It is very important to know the value of your belongings for valuation purposes
